PROFESSIONAL SUMMARY

Full-stack developer with 5+ years of experience engineering production-grade web applications, AI-powered tools, and scalable backend systems. Specialized in **Python (FastAPI, Flask)**, **React/Next.js**, and **DevOps**. Core contributor to the open-source **Crawl4AI** project, delivering high-throughput crawlers and LLM integrations. Proven ability to lead QA teams and automate complex workflows to drive operational efficiency.

CORE COMPETENCIES

- **Backend:** Python, FastAPI, Flask, Node.js, RESTful API Design, ETL Pipelines.
- **Frontend:** React.js, Next.js, Angular 17, Ionic, Tailwind CSS, Bootstrap.
- **Data & Infrastructure:** MySQL, PostgreSQL, MongoDB, Docker, Nginx, CI/CD, Linux (Bash).
- **Automation & QA:** Playwright, Web Scraping (Crawl4AI), LLM API Integration, Automated Testing.

PROFESSIONAL EXPERIENCE

Software Developer | KPLAYTEAM (Kidocode Group)

Kuala Lumpur, Malaysia | March 2025 – Present

- **Orchestrated** backend services for Cubie LMS and Crawl4AI, supporting daily operations via automated data pipelines and high-concurrency crawling endpoints.
- **Engineered** 10+ FastAPI RESTful APIs for core data workflows, reducing manual data processing time by **60%** through automation.
- **Architected** a refactored Docker server environment, eliminating deployment errors and enabling repeatable one-command releases.
- **Deployed** scalable Playwright crawling instances capable of handling hundreds of concurrent automated extraction sessions.

Full-Stack Developer | Kidocode Sdn Bhd

Kuala Lumpur, Malaysia | 2022 – 2024

- **Spearheaded** the development of an AI-powered course generator using Python and LLM

- APIs, reducing manual content creation effort by **80%**.
- **Directed** a 5+ person QA team responsible for full-cycle application testing, bug reporting, and release validation for production environments.
- **Collaborated** on cross-platform UI development for "Mojitofilms" using Ionic and Next.js, ensuring responsive design across mobile and web.
- **Resolved** 100+ software bugs across live production systems, significantly improving platform stability and user retention.

Web Department Manager & Trainer | Kidocode

Kuala Lumpur, Malaysia | 2020 – 2022

- **Mentored** 100+ students in Python and web development, managing a team of trainers to deliver a project-based curriculum.
- **Designed** 15+ interactive learning modules and 8+ real-world projects, resulting in a measurable increase in student graduation rates.

TECHNICAL PROJECTS & FREELANCE

Web Infrastructure Manager | Freelance

2023 – 2024

- **Managed** end-to-end infrastructure for **5 WordPress sites**, achieving **100% data integrity** and a **40% reduction** in vulnerability risks through automated security hardening and package updates.

Medical Management System (Flask, Angular 17, MySQL)

- **Developed** a clinical platform to streamline patient records, appointments, and administrative reporting; successfully deployed for a private healthcare client.

Crawl4AI (Open Source)

- **Contributed** to a scalable web crawling framework featuring concurrent Playwright sessions and ETL pipeline integration using FastAPI and Docker.

EDUCATION

BSc Software Engineering | SEGi University, Malaysia | 2015 – 2019
